

CLEAR QUIET COMFORT

Discover how our innovative,
moisture control solutions provide
a clear advantage.

ClairiTech
INNOVATIONS

advanced clean air technology

> PURE

Expel. Replenish. Ventilate.

Our goal is clear. Get rid of excess moisture, contaminants, molds, musty odors, pollutants and toxins in homes, apartments, garages and other spaces. These are things that you don't easily see, but take away from enjoyment, well being and importantly, the overall value of the place.

ClairiTech products quietly go about the business of ensuring the home you are building, renovating, or living in has a healthier environment and more usable living space.

Day in and day out, our ventilation systems are working hard to protect your investment, yet they are energy efficient and effortless to maintain.

INNOVATIVE

*European influenced design,
North American manufactured.*

At ClairiTech, we take great pride in our ongoing Research and Development to create patented products and continuously improve our line of products, including intelligent software and smart technology.

Our onsite R&D capabilities ensure innovation, cost efficiency and performance for years to come.

We are committed to sustainability and environmental responsibility, both in the products we make and in our manufacturing process.

So you can be clear you've made a great, longterm choice.

Patented, proven and industry leading.

ClairiTech's exclusive patented HCV process continuously monitors humidity, temperature and dew point.

ClairiTech's patented ERV/HRV air exchanging system features a double hybrid core designed to distribute air throughout the home, controlling the humidity and transforming it into a more comfortable environment.

This system is the only product in the market that features both an ERV and an HRV core, that recovers the energy from the stale air and then transfers it to the fresh air.

The use of two independent cores allows the system to clean the basement air as well, transforming it into a usable, livable space, without losing any of the efficiency.

COMFORT

CLEAN, QUALITY AIR DOESN'T SIMPLY HAPPEN OVERNIGHT. THOUGH IN MANY CASES, THE DIFFERENCE CAN BE FELT WITHIN DAYS.

We stand by all the ventilation systems we make with a Performance Guarantee that gives you peace of mind for a complete seasonal cycle to fully maximize the effectiveness and benefits.

- It's what you don't see - the problem is often invisible - controlling moisture and humidity prevents molds and mildew, as well as structural damage.
- It's what you don't hear - so quiet you won't know it's there - forget noisy dehumidifiers that don't even do a fraction of the same job.
- It's what you don't pay - there are no high energy bills - our products operate so efficiently, the added cost is equivalent to one light bulb.
- It's what you don't worry about - enjoy guaranteed peace of mind - our company has been creating better living environments for over 25 years.
